

# Own Your Power

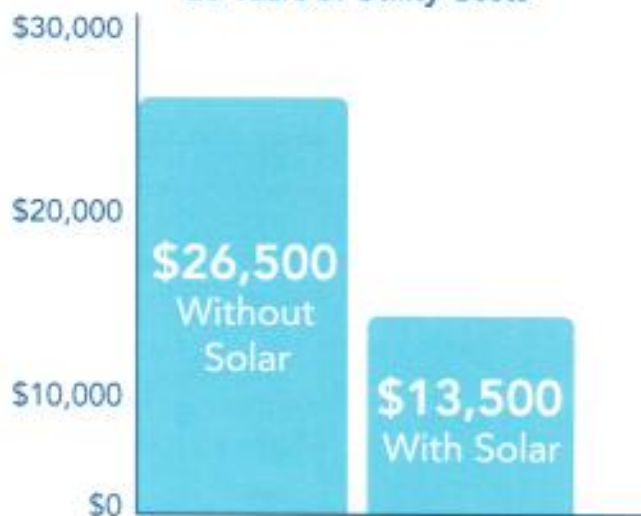

ZERO MONEY DOWN **SOLAR** LOANS

*"Putting solar on our house keeps money in our pocket and gives us a great feeling of doing our part to help the environment"*

*-The Mayberry Family*

## 25 Years of Utility Costs

## You Own the System

100% of savings go to you for the life of the system

## Secure Cost of Energy

Monthly solar rates will never go up even while grid prices do

## Reasonable Rates

2.99% over 12 years

## Easy Approval

Up to \$55,000 in financing for qualified homeowners, approval within minutes

New Hampshire & Massachusetts (603) 679-1777

# Own Your Power

## PAYMENT EXAMPLES

### SOLAR ELECTRICITY

16 Solar Panels • 4 kilowatts

**Estimated Payment:**  
\$80 per month

**Benefits:**  
Save 5,000 kilowatt hours  
of electricity each year

### SOLAR HOT WATER

2 Flat Plate Collectors

**Estimated Payment:**  
\$70 per month

**Benefits:**  
Save 150-200 gallons  
of oil each year

### AIR SOURCE HEAT PUMP

1 Heating Unit

**Estimated Payment:**  
\$40 per month

**Benefits:**  
Save 250+ gallons  
of oil each year

# THE ROAD TO SOLAR

## STEP 1

### It all begins with a SOLAR SITE EVALUATION

A site evaluation lasts one to two hours, during which one of our quaters will review how solar energy systems work, look at your roof, basement, and electrical panel, perform a shade analysis, and learn about your overall energy goals.

## STEP 2

### Receive your SOLAR PROPOSAL

After your site evaluation, you'll receive a proposal(s) for the project(s) discussed during your visit. This is a starting point – if you'd like to see something different, such as a smaller solar electric array or a larger solar hot water system, proposals can be amended to reflect your energy goals.

## STEP 3

### Interested in moving forward? Next comes the CONTRACT & REBATE PAPERWORK

If you decide to go forward with a system(s), we will send you a contract packet that includes: two copies of your contract, one to keep and one to return to ReVision; an invoice for 33% of the project cost (to pay for equipment and get your project in the installation queue); once we receive we will then send the utility and rebate paperwork. (for solar electric systems).

## STEP 4

### Solar INSTALLATION

A team of certified, knowledgeable and friendly installers will arrive to install your solar energy system(s). A typical installation is completed in two to three days. Then the sun takes over!

## STEP 5

### Submit your FINAL PAPERWORK

After your project(s) is complete, you will get a system walkthrough by your project manager and our office will mail you the final invoice.

# Solar Hot Water Systems

## How It Works:

1. Sun heats solar thermal collectors
2. Solar heated antifreeze mix is pumped down from roof and through heat-exchanger in solar tank
3. Hot water flows out to sinks, showers, etc. Backup unit automatically runs if solar tank is not warm enough

## enjoy free hot showers COURTESY OF THE SUN

- Supply 70% or more of your domestic hot water
- Reduce energy bills and increase energy security
- Can integrate with oil, gas, or electric backup system
- Save up to 300 gallons of oil each year, offsetting 3,000 to 5,000 pounds of carbon pollution
- **Own Your Power** financing available - trade oil bill for fixed monthly payment
- Eligible for a 30% Federal Tax Credit and cash state rebates
- Systems last up to 20 years

# Grid-Tied **Solar** Electricity

“ I am very pleased with the work done. Everyone was very helpful and the crew cleaned up after themselves. My last month's electric bill was just \$7! ”  
- Deborah P.

IF YOUR ELECTRIC BILL IS . . .

**\$50 PER MONTH**

**TWELVE PANELS (3 kW)**

**Estimated Cost (fully installed): \$10,500 - \$12,000**

**Estimated Cost (after incentives): \$5,100 - \$6,200**

**Financed Payment: \$40-\$50/month**

**Estimated Production: 3,810 kilowatt hours/year \***

**Size of the array: 11' x 20'**

IF YOUR ELECTRIC BILL IS . . .

**\$80 PER MONTH**

**TWENTY PANELS (5 kW)**

**Estimated Cost (fully installed): \$17,500 - \$20,000**

**Estimated Cost (after incentives): \$7,000 - \$8,000**

**Financed Payment: \$70-\$80/month**

**Estimated Production: 6,350 kilowatt hours/year \***

**Size of the array: 11' x 34'**

IF YOUR ELECTRIC BILL IS . . .

**\$145 PER MONTH**

**THIRTY-SIX PANELS (9 kW)**

**Estimated Cost (fully installed): \$31,500 - \$36,000**

**Estimated Cost (after incentives): \$18,300 - \$21,500**

**Financed Payment: \$135-\$145/month**

**Estimated Production: 11,430 kilowatt hours/year \***

**Size of the array: 22' x 30'**

*May also be eligible for performance-based SRECs (MA Only)*

\* Rough Estimates. Production levels and savings will vary based on site. For a firm quote, please contact ReVision Energy.

# Grid-Tied **Solar** Electricity

## How It Works:

1. Sun hits panels, creating DC electricity
2. Solar inverter converts DC power into AC power for household needs such as lights, television, computers, etc.
3. Excess power is sent to the grid, crediting your monthly bill

## Save money while making **FREE ELECTRICITY FROM THE SUN**

- Reduce energy bills while increasing energy security
- Typical return on investment is 8-10%
- Financial incentives from the government are available
  - Maine: 30% Federal Tax Credit
  - New Hampshire: 30% Federal Tax Credit, State Rebates
  - Massachusetts: 30% Federal Tax Credit, State Rebates & SRECs
- **Own Your Power** financing available - trade your power bill for a fixed monthly payment
- Generate as much electricity as you need with no batteries or maintenance required
- Eliminate thousands of pounds of carbon pollution from regional fossil fuel power plants
- USA-made solar options are available

# Why Choose ReVision Energy?

*We believe renewable energy systems must be as robust and dependable as traditional energy sources. This is why ReVision Energy has pioneered a full-service mechanical contracting approach to solar electric and solar hot water system integration. Our unmatched depth of project experience guarantees the desired outcome for every client: a highly reliable, performance-optimized solar energy system that will last for decades in northern New England's challenging climate.*

## **Designed by Experts**

Whether it is new construction or an existing property, every project has singular aspects that our team carefully assesses in the evaluation process. Your system is then designed by ReVision Energy's experienced in-house team of engineers from Brown, Dartmouth, MIT, and UNH. Our goal at every step of the design phase is to maximize system performance and longevity while meeting the specific requirements unique to your project.

## **Installed by Professionals**

By using our own highly-trained team of professional solar technicians on every project, we streamline system installation and eliminate the confusion and difficulty of working with multiple subcontractors. In addition to NABCEP certification (the industry's highest level of training and accreditation), our technicians carry state solar installer certifications. ReVision Energy also holds applicable Master licenses to ensure that every system is code-compliant and qualifies for government financial incentives.

## **Cost Competitive Solar Energy**

Over the course of nearly 3,000 successful solar energy installations across three locations in Maine and New Hampshire, ReVision Energy has developed long-term volume purchasing relationships with manufacturers of high quality system components. This enables us to source the very best components at a significant discount and pass the savings on to you.

## **Backed by Our 24-hour Service Guarantee**

ReVision Energy backs every system with a promise to deliver exceptional customer service. Our technicians perform regularly scheduled preventative maintenance to ensure your system is operating at peak performance over the long haul. In addition, should you need assistance any time, day or night, our technicians are on-call for you.

# Installation Team

Our in-house installation team of more than a dozen specially-trained solar technicians [including Master Electricians, Plumbers, certified helpers and NABCEP certified licenses] come from a variety of backgrounds but all with one thing in common: **They believe in the work they are doing and choose to work for ReVision Energy because they are able to make a difference each day.**

ReVision Energy encourages staff members to gain certifications or licenses and offers reimbursements, so that our installers are increasingly improving their skills and have an opportunity to advance in their chosen trade. With technical proficiency and pride in their work, our team provides the core tenets of ReVision's mission – customer service without compromise.
